- ▶ Resists chemicals and abrasion

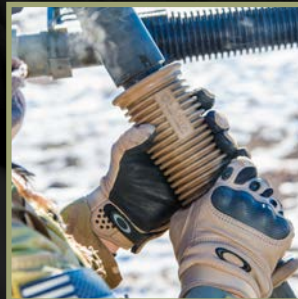

PROUDLY MADE

IN THE USA

Available in Black, Flat Dark Earth, Olive Drab & Camouflage.

Temperature Test Fire Demonstration

I think a concise paragraph summarizing the 200 round temperature test with the barrel swap, mid test would be a good fit here. This whole area will be devoted to the temperature test and we'll drive them to the video for additional information. Descriptions of the 3 photos above (if needed) would be put in this paragraph so there would be no need for captions. This is like a mini case study to get the user to the website.
