STAY COOL
GOING HOT™

Manta Material Characteristics:

Unaffected by heat during cyclical or sustained fire.
- Does not melt and is not affected by Thermo Shock.
- Reduces mirage and IR signature from suppressor or barrel heat.
- Comfortable to touch, even after harshest firing sequence.

Remains tactile and grip-able in any environment.
- Does not freeze, ice/snow will not adhere to surface.
- Resists heat absorption and degradation from sun.
- Unaffected by dirt, sand, moisture or saltwater.
- “Rubber-like” texture helps to increase control.

Resists chemicals and abrasion.
- Unaffected by firearm cleaning products.
- Protects firearms from abrasion.
- Extremely flexible yet inherently tough.
