

# M-LOK RAIL GUARDS

Create a hardwearing tactile rail grip that installs in seconds, securely locks onto rail, and resists extreme heat.

# M-LOK RAIL GUARDS

The Manta rail guard designed for M-Lok rails not only pushes into and fully engages into the M-Lok slot, there are also friction tab inserts that expand the guards, further preventing them from pulling out of the rail. The Manta guards solve the issue of newer slim profile rails being too hot to handle. The Manta rail guards for M-Lok rails will allow you to handle the weapon even during full auto fire!

MADE IN THE USA
