

TAC-WRAP™

Create a hardwearing tactile grip that keeps cool during the intense heat of sustained or automatic fire. Wrap it up!

MANTA®
DEFENSE

TAC-WRAP™

Manta TAC-Wrap is designed to fit around rifle forends that only feature a top rail; creating a low profile, heat mitigating, rubber-like gripping surface. The TAC-Wraps flexible material will stretch and conform around the contours of any rifle. TAC-wrap is perfect for Key-Mod, M-Lock or any forend that accepts bolt on rail sections. Simply install the attachment hardware to your top rail and cover your forend, no matter what profile shape it may feature.
